

Transitional Roadmaps

Purpose

- The purpose of the Transitional Roadmap is to move an organization from feature based roadmaps to roadmaps that are more focused on the business results they are hoping to achieve within a particular timeframe.
- These roadmaps can be used to communicate which feature “candidates” are expected to deliver on the promise of the OKRs.
- It is important to note the use of the term feature candidate vs. feature as the discovery process assumes we don’t know what we are building until we have mitigated as much risk as possible
- Transitional roadmaps assume the user fully understands the value of OKRs.
